

Read carefully the installation

VERY IMPORTANT: You have already worked with the software!

Before launching the installation program, close the “CommisSoft” application.

All data are logged in your “Database” file. Please make sure to **save** it by copying the “Database” file of your hard disk under: **C ou ? :\Programme ou Programme file\Soft-Euro\CommisSoft V2.0 ou V2.?\database**

We recommend you to save your data on an external support with required memory - Key USB,...

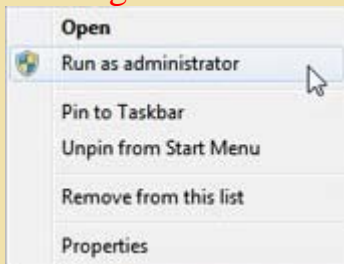

Installation

You must save the file “majCommisSoftV2.5.2.zip” **in your hard disk where** the software is installed.

Please make sure you are connected as administrator.

Select the downloaded file: “ majCommisSoftV2.5.2.exe” to launch the installation.

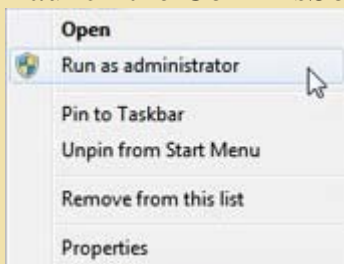

Do a **right click with the mouse** and **execute as administrator**.

Follow the installation process instructions.

Select the “**Repair the installation**” option and follow the instructions in the dialogue box to complete the installation.

Launch the CommisSoft program. Do a **right click with the mouse** and **execute as administrator**.

Your database will automatically be converted into a new format and a copy will be created in the folder: “database”.

When opening the program, enter your logon and password as before. The update process is now completed. You may use your software.

Thank you for your attention,

Soft-Euro team
