

Read carefully the installation

1. Installation

You must save the file “majCommisSoftV2.5.2.zip” in your hard disk where the software will be installed.

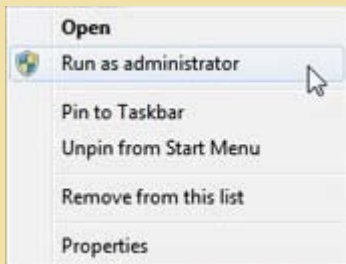

Please make sure you are connected as administrator.

Select the downloaded file: “ majCommisSoftV2.5.2.exe” to launch the installation. Do a right click with the mouse and execute as administrator to launch the installation.

Follow the instructions in the dialogue box to complete the installation.

2. When launching your CommisSoft software the first time.
Do a right click with the mouse and execute as administrator.

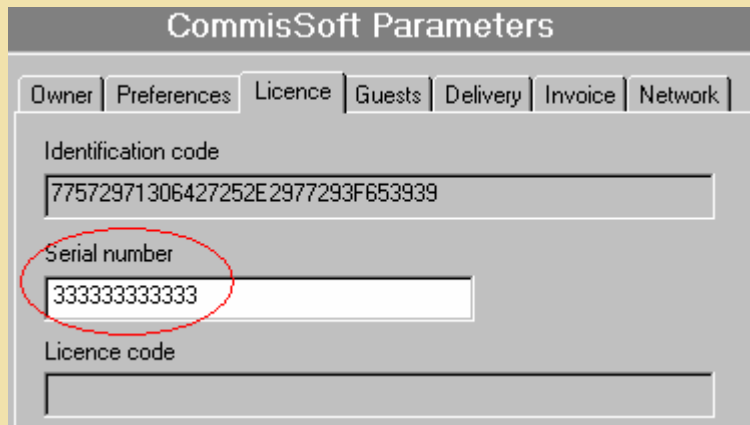

Enter your proprietary identification information, then click on Next.

Select your preferences then:

- Enter your connection user name (Example: Your initials)
- Enter your password
- In case you forgot your password, answering this question will enable you to open the program (Example: Color of your grand-mother eyes?), answer is (Example: Blue), then click on Next.

Enter your **serial number CommisSoft** was sent to you by e-mail or mail.

CommisSoft Parameters

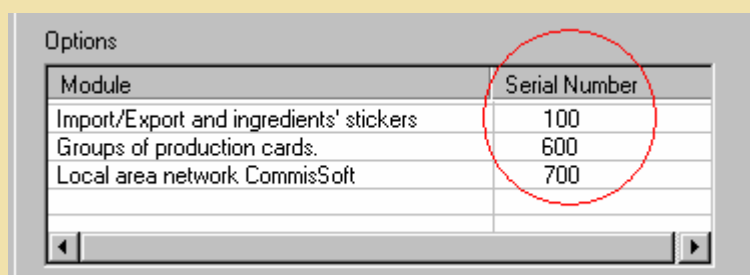

Owner | Preferences | **Licence** | Guests | Delivery | Invoice | Network

Identification code
77572971306427252E2977293F653939

Serial number
333333333333

Licence code

In the "Options", double click on the name of the module and enter the **serial number for the Module** was sent to you by e-mail or mail.
